# Three Key Points of Waste Management

# WASTE REDUCTION

Can't you find reusable, eco-friendly  
for e-waste reduction but you

## What is source reduction of waste?

### Preventing waste generation

1. Both production line workers and regular employees should avoid using disposable packaging materials.
2. Encouraging suppliers to use reusable packaging when delivering products to the facility.

### Saving resources

In addition to avoiding single-use packaging materials, reusable materials should be utilized multiple times to maximize their use.

### Changing daily behaviors

Review the waste we generate — which items cannot be reused or recycled? By changing our daily behaviors, each of us can contribute to protecting the planet.

# Refuse disposable tableware

## Company Policy

The company will no longer provide disposable tableware and encourages employees to bring their own utensils.

## Environmental Impact

Excessive use of disposable tableware increases plastic waste, placing a burden on the environment.

## Personal Action

By bringing our own utensils, we can effectively reduce the amount of plastic waste.

# Bring your own reusable cup

## 1 Reduce Single-Use Cups

To reduce the use of disposable paper and plastic cups, the company encourages employees to bring their own reusable cups.

## 2 Simple Action

Each employee can help conserve resources through this simple action.

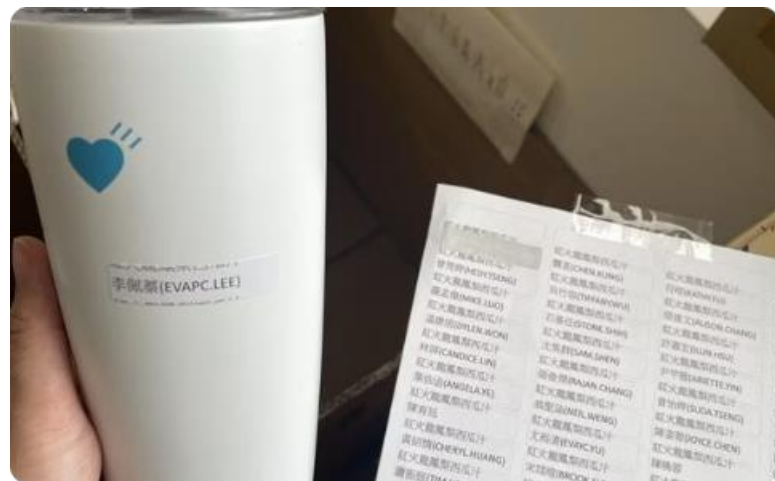

## 3 Reduce Waste

Using a reusable cup can effectively reduce the amount of waste.

# Fruit Day Announcement

## Environmental Practice

Two boxes will be placed next to the pantry cabinet on the 8th floor for everyone to place their reusable cups.

## Environmental Reminder

Those who do not place their reusable cups by 10:30 AM the next day will have points deducted from their TCI Coins.

## Environmental Awareness

Employees are encouraged to use reusable cups to reduce the use of disposable ones.

# Resource Recycling Promotion in the Work Area

# Usage of Sorting Trash Bins

Recyclables

Plastics, Paper, Metals

Food Waste

Leftover Food

General Waste

Non-recyclable Items

Using a waste sorting system helps reduce the amount of waste sent for incineration or landfilling.

# Promotion of Administrative Service Center

## Trash Can Update

The trash cans in the freight elevators on each floor have been updated; please sort according to the labels.

## Paper Container Classification

Used paper containers, lunch boxes, and paper cups should be disposed of in the trash bin.

## Paper Recycling

For paper recycling, please ensure that staples are removed to avoid injury to cleaning staff during sorting.

## Bottle and Jar Classification

Bottles and jars should be divided into glass and plastic. Please pour out any liquids, clean them, and then sort.

## Food Waste Handling

The food waste bins have been removed. If you have food waste, please pour any liquids into the tea room sink before disposing of the food waste in the general trash.

## 環境整潔，需要你我共同維護

『用過的紙容器、便當盒、紙杯』請丟一般垃圾

Please dispose of used paper containers, lunch boxes, and paper cups in the 'Trash' bin.

PAPER

GLASS

玻璃瓶

PLASTIC, CAN

瓶罐類

⚠️ 玻璃瓶請小心輕放

⚠️ 請將飲料內容物倒掉，清洗乾淨後分類回收

Handle glass bottles with care when placing them. Empty beverage contents, **Clean** thoroughly, and then classify for recycling.

# Water Resource Management

# Why is it important to conserve water?

## Limited Resources

Water resources are limited, and we have a responsibility to ensure future water supply needs.

## Reduce Costs

Reducing water waste can lower costs. Conserving water helps protect the environment.

## Environmental Protection

# TCl: The first manufacturing company in Taiwan to join the Alliance for Water Stewardship (AWS)

- 1 As an expert in liquid health products, investing in water resources for sustainable development can enhance the company's image.
- 2 Manage water-related risks, including financial impacts caused by extreme weather.
- 3 Increase the company's water recycling rate and improve water efficiency.

# Alliance for Water Stewardship (AWS) Member Company

TCI Co., Ltd.

# Steps for Water Efficiency Management for Employees

## Monitor Water Usage

Pay attention to your daily water consumption, whether in restrooms, break rooms, or other public areas.

1

## Report Leaks

If you notice any leaks, report them to the management immediately.

3

## Turn Off Water

Ensure to completely turn off the faucet or any water-related equipment after use.

2

# Raise Awareness, Change Behavior

Corporate Responsibility

Personal Responsibility

Provide Training

Conscious Participation

Install Facilities

Practice Environmental Behavior

Environmental behavior is not only a corporate responsibility but also a personal one.

This training will help employees understand how to effectively reduce waste and conserve water, and put it into practice.

# Join the Action for a Better Environment!

1

## Start with Small Actions

Everyone can begin with small actions.

2

## Participate in Company Initiatives

Actively take part in the company's waste reduction and water conservation programs.

3

## Create a Sustainable Future

Build a more sustainable environment for our future.
